Umea

Sanitary Unit

Umea is a mobile and fully equipped sanitary unit consisting of two separate rooms. The container has a complete installation that can be customised. This allows us to offer custom solutions made to the customer's specifications.

The Umea is ideal for campsites, recreational areas, construction sites or mass events. The mobile sanitary unit can also be used by staff in areas where access to traditional sanitary facilities is difficult. An unquestionable advantage of our solution is the ease of cleaning. Umea requires no maintenance or emptying. It is sufficient to connect water, sewerage and electricity to take full advantage of the functionality offered.

You can choose a standard model without fittings in the BASIC version or with fittings – the COMFORT option. Additionally, you can adjust the type of elevation and variants: windows, heating, lighting and other accessories.

The photos are for illustrative purposes only and do not constitute the subject of the offer. Other options can be selected at an additional cost. Dimensions may differ from actual dimensions by ± 3 cm.
